Software Based Solutions

CareWare

A staff schedule optimization system on a complete web architecture for healthcare organizations.

CareWorks

A web-based workforce demand forecasting system which uses acuity measurement and other methodologies to estimate required nursing skill-mix.

Interfaces

Solutions for interfacing real time or batch human resource, time and attendance, and other data with our systems.

ForeSite

An advanced forecasting technology which helps determine expected outcomes.

Internal Productivity Tracking System

A powerful system for measuring relative efficiencies among alternative outlets within large enterprises.

Procurement Channels

We provide our services through a variety of procurement instruments:

- Mobis GSA Schedule
- IT70 GSA Schedule
- Small Business Set Asides
- Blanket Purchase Agreements
- Veteran and Service Disabled Veteran (VETS GWAC Partners)
- Native American (Partners)

Care Systems Inc.

Our subsidiary company, Care Systems Inc. (CSI), provides Commercial Off-The-Shelf software packages which support healthcare workforce management. CSI's web-based software packages provide healthcare organizations with the following benefits:

- Guaranteed savings
- Less time spent scheduling and, thus, more time spent providing quality patient care
- Improved staff satisfaction and retention
- Quick implementation
- Data integration with HR and time and attendance systems
- Enterprise data accuracy
